PROFILE

Master's student in Computer Science and Econometrics (Big Data specialization) at the University of Gdańsk, with a bachelor's degree in Mathematical Modelling and Data Analysis. I work across the full data analysis process - data preparation and validation, statistical analysis, dashboard development, and clear reporting - using SQL, Excel, Power BI, Python, and R. I integrate AI-assisted workflows into my work, including agent-based tooling and LLM support for exploration, prototyping, validation checks, and documentation, while keeping full ownership of data quality and final conclusions. During my internship at the Warsaw Stock Exchange (GPW WATS project), I worked with market data, data quality control, and operational process analysis.

EXPERIENCE

Intern, Exchange Systems Development Department (GPW WATS Project)

Warsaw Stock Exchange | 08.2023 - 09.2023

- Collected, cleaned, and structured market data for analytical use in the WATS project.
- Verified data quality and accuracy of records in the STORK supervisory application.
- Analyzed and parameterized supervisory alerts using statistical methods.
- Reviewed settlement processes on European markets and identified areas for improvement.

SELECTED PROJECTS

US Flight Delays

- Analyzed 5.8 million US domestic flights (2015, BTS/Kaggle) in Power BI and Tableau using a star schema, DAX measures, and What-If parameters.
- Built dashboards covering on-time performance, Top N airports/routes, delay cause, and data quality checks.

NASA NEO - Asteroid Classification

- Classified nearly 90,000 Near Earth Objects in R with logistic regression, LASSO, and PCR after class balancing and feature standardization.
- Best accuracy: LASSO (86.2%); highest sensitivity: PCR (98.8%), with full EDA and model comparison report.

Factory Reset - Multivariate Analysis

- Ranked 16 Polish voivodeships on 22 socio-economic indicators (Statistics Poland Local Data Bank, 2024).
- Built a full R pipeline with PCA, clustering, and TOPSIS/COPRAS rankings for comparative reporting.

SKILLS

- Tools:** SQL, Excel, Power Query, Power BI, Tableau, Python, R
- AI & Automation:** Cursor, Codex, ChatGPT, Gemini, n8n
- Analytics:** ETL, exploratory data analysis, regression, classification, statistical methods, data visualization
- Languages:** Polish (native), English (C1)

EDUCATION

University of Gdańsk

Master's degree

Computer Science and Econometrics (Big Data)

10.2025 - present

University of Gdańsk

Bachelor's degree

Mathematical Modelling and Data Analysis

10.2022 - 07.2025

CERTIFICATES

- Power BI, Introduction to Data Science, Digital Transformation - Santander Open Academy (09.2025)
- AI Fundamentals - DataCamp (07.2026)
- English C1 - University of Gdańsk (07.2022)
