PROFILE

Master's student in Computer Science and Econometrics (Big Data specialization) at the University of Gdańsk, with a bachelor's degree in Mathematical Modelling and Data Analysis. I combine data preparation and validation with statistical analysis and dashboard development to translate insights into clear, actionable results. I use AI tools (coding and analysis assistants) to support prototyping, improve workflow efficiency, and help with validation steps. During my internship at the Warsaw Stock Exchange (GPW), I worked with operational data, data quality control, and process analysis.

EXPERIENCE

Intern, Trading Systems Development Department (GPW WATS Project)

Warsaw Stock Exchange | Aug 2023 - Sep 2023

- Collected, cleaned, and structured market data for analytical use in the WATS project.
- Verified data quality and accuracy of records in supervisory applications.
- Analyzed and parameterized supervisory alerts using statistical methods.
- Reviewed settlement processes on European markets and identified areas for improvement.

SELECTED PROJECTS

US Flight Delays

- Analyzed 5.8 million US domestic flights in Power BI and Tableau using a star schema, DAX measures, and What-If parameters.
- Built dashboards supporting business decisions, data quality checks, and delay driver analysis.

NASA NEO - Asteroid Classification

- Analyzed nearly 90,000 Near Earth Objects in R using classification models.
- Compared logistic regression, LASSO, and PCR; the best model achieved 86.2% accuracy.

Factory Reset - Multivariate Analysis

- Compared 16 Polish voivodeships using 22 indicators from the Local Data Bank with PCA, clustering, TOPSIS/COPRAS, and canonical analysis.

NBA Statistics Analysis

- End-to-end R project: data acquisition, cleaning, and consistency validation for NBA player and game datasets (ETL).
- Exploratory analysis and regression models linking key statistics to outcomes; built clear insights with visualizations in a final report.

SKILLS

- **Tools:** SQL, Excel, Power Query, Power BI, Tableau, Python, R
- **AI & Automation:** Cursor, ChatGPT, Gemini, n8n (basics)
- **Analytics:** ETL, exploratory data analysis, regression, classification, statistical methods, data visualization
- **Strengths:** analytical thinking, accuracy, logical reasoning, teamwork, independence
- **Languages:** Polish (native), English (C1)

EDUCATION

University of Gdańsk

Bachelor's degree

Mathematical Modelling and Data Analysis

Oct 2022 - Jul 2025

University of Gdańsk

Master's degree

Computer Science and Econometrics (Big Data)

Oct 2025 - present
